

SOC 2 Assurance Evidence - Sample

Checklist item 3 | Phase one - Establish the relationship

SAMPLE TEMPLATE. Replace every required {{PLACEHOLDER}} value before using this as completed evidence. For legal documents, obtain counsel/client approval as appropriate.

Purpose

Supporting security-review evidence file.

Required validation fields

Field	Value
Organization	{{PROVIDER_LEGAL_NAME}}
Report period	{{SOC2_REPORT_PERIOD}}
Audit firm	{{SOC2_AUDIT_FIRM}}
Report type	{{SOC2_REPORT_TYPE}}
Status	Complete

Evidence summary

A current SOC 2 report covering the provider environment and relevant trust-service criteria is available for client due diligence subject to applicable confidentiality and distribution controls.

Control areas

Security controls include identity and access management, change management, monitoring, incident response, vendor oversight, backup/recovery, and logical/environmental safeguards relevant to the hosted service.

Validation intent

This template is designed so the application can mark the checklist item as successful when the file is present, all required values are non-blank, the document status is **Complete** or equivalent, and no required placeholder remains unresolved.
